The primary goal of action research is not just to generate knowledge but to bring about positive change in the practical setting.

Action research is widely employed in educational settings. Teachers and educators use it to improve teaching methods, curriculum design, and student learning outcomes. For example, a teacher might identify a challenge in student understanding, implement changes in teaching strategies, and assess the impact of those changes through action research.

### About the College:

Hazi A K Khan College is the lone representative institution of Higher Education at Hariharpara Block. The Block was endowed with a considerable number of Primary, Secondary and Higher Secondary Institutions. But no institution was there to cater further education for the young aspirant stakeholders; predominantly the girls. The idea was initially conceived by honourable Hazi Abdul Kader Khan who donated land to set up a college. Afterwards, some local robust persons took timely initiatives in framing required Society Registration and completed other formalities with the Government. The long-cherished dream came true in 2008, when Hazi A. K. Khan College started its journey at Hariharpara High School getting affiliation from University of Kalyani with Honours and General Courses in some traditional disciplines in Arts. Very soon the institution was shifted to the present location. At present twelve academic departments in Arts are there, out of which seven have Honours Courses.

### About the Seminar:

Action research is a systematic approach to inquiry and investigation that is typically conducted by practitioners in their own context to solve specific problems, improve practices, or bring about positive change. It is a form of self-reflective inquiry that involves a cyclic process of planning, acting, observing, and reflecting.
