

HAZI A. K. KHAN COLLEGE
DEPARTMENT OF GEOGRAPHY
PROGRAMME OUTCOMES

After completion of the B.A. Geography (Hons.) Programme, the students will be able to

PO1. Proficiency in Grasping and Applying Fundamental Concepts Within the Field of Geography: Master the core principles and theories in geography, learning to apply this knowledge effectively in various practical and research contexts.

PO2. Critical Thinking: Develop the ability to critically analyze geographical data and theories, challenge conventional wisdom, and synthesize new insights from diverse information sources.

PO3. Communication Skills: Enhance their ability to clearly and effectively communicate complex geographical information verbally and in writing, catering to academic, professional, and lay audiences.

PO4. Social Interaction: Engage in collaborative projects and discussions, improving their ability to work within teams and interact with diverse groups, which is crucial for fieldwork and professional networking.

PO5. Human Values: Learn to incorporate ethical considerations into their work, respecting cultural and environmental contexts, which supports responsible and ethical geographical practice.

PO6. Laboratory Skills: Acquire practical skills in using geographic laboratory equipment and techniques, essential for conducting physical geography research and analyses.

PO7. Environmental Awareness and Sustainability: Understand the impact of human activities on the environment and learn sustainable practices, enabling them to contribute to solving environmental challenges.

PO8. Recognize the Skill Development in Geographical Studies Program as Part of Career Avenues in Various Fields Like Teaching, Research, and Administration: Recognize the skill development opportunities in geographical studies that prepare them for careers in teaching, research, and administration. recognize how the skills developed in their geographical studies can be applied in various career paths, including education, research, and administrative roles within public and private sectors.

PO9. Regional and Cultural Understanding: Explore regional geography and understand the cultural factors that influence geographical phenomena, enhancing their ability to work in diverse global settings.

PO10. Physical and Human Geography Integration: Learn to integrate methods and perspectives from both physical and human geography to provide a comprehensive approach to solving geographical problems.

PO11. Fieldwork and Research Proficiency: Become proficient in conducting fieldwork, using geographical methods to collect, analyze, and interpret data, which is crucial for academic and professional research.

PO12. Disaster and Risk Management Expertise: Specialize in identifying, analyzing, and managing risks associated with natural and human-made disasters, preparing them to contribute to disaster response and mitigation efforts.

PO13. Urban and Rural Planning Insight: Gain insights into the planning processes and challenges associated with both urban and rural environments, preparing them to address issues such as urban sprawl, land use planning, and rural development.

PO14. Geospatial Data Interpretation: Develop advanced skills in interpreting and utilizing geospatial data, crucial for modern geographical analysis and applicable in various technologies like GIS and remote sensing.

PO15. Spatial Analysis Proficiency: Become proficient in spatial analysis techniques, enabling them to analyze patterns, trends, and relationships within geographic data, which is essential for many areas of geography.

PO16. Understanding the Relevance of Geographical Knowledge to Everyday Life: Apply geographical knowledge to everyday life, recognizing its relevance and importance in addressing real-world issues, from local community planning to global environmental changes.
