

About the Seminar

Every year, World Nature Conservation Day is celebrated on 28 July to create awareness among people about the importance and significance of natural resources. In 2023, the theme of this day is "Conserve nature, conserve life." Nature conservation and sustainable development are two interconnected concepts that aim to address environmental, social, and economic challenges while ensuring the well-being of both current and future generations. This seminar, organised by NSS Unit, Hazi A. K. Khan College and NSS Unit, S. R. Fatepuria College focuses on the interplay between nature conservation and sustainable development. It can be highly beneficial in raising awareness and fostering discussions on how to strike a balance between environmental protection and socio-economic progress.
