Policy Document: Management of Degradable and Non-Degradable Waste

Hazi A.K. Khan College is committed to implement effective strategies for managing both degradable and non-degradable waste.

Objectives:

1. To lead by example in promoting sustainable waste management practices within the college campus.
2. To reduce the environmental impact of waste generation and contribute to a cleaner environment.
3. To educate students, faculty, staff, and the local community about the importance of waste segregation, recycling, and responsible disposal.
4. To raise awareness about the adverse effects of improper waste management on the environment and public health.
5. To implement effective waste management practices for both degradable and non-degradable waste streams.
6. To minimize waste generation and maximize recycling and reuse opportunities.

Initiatives:

- Implement a waste segregation system to separate degradable (organic) and non-degradable waste at the source. Non-degradable waste is further segregated into metal waste and non-metal waste.
- Establish recycling facilities on campus for processing recyclable materials.
- Set up composting units for processing organic waste, such as food scraps and garden waste, into nutrient-rich compost for use in gardening.
- Collaborate with waste management agencies to ensure the proper disposal of non-degradable waste, such as plastics and electronic waste.
- Promote the use of biodegradable alternatives and eco-friendly products on campus.
- Conduct regular awareness campaigns, workshops, and seminars on waste management and sustainability for students, faculty, and staff.
- Encourage behavioral changes to reduce waste generation and promote recycling practices.
- Establish mechanisms for monitoring waste generation, segregation, recycling rates, and disposal practices on campus.
- Conduct periodic evaluations to assess the effectiveness of waste management initiatives and identify areas for improvement.
- Engage students, faculty, staff, and the local community in waste management initiatives and sustainability projects.
